Introduction to Algorithms Lecture Notes. This note concentrates on the design of algorithms and the rigorous analysis of their efficiency. Topics covered includes: the basic definitions of algorithmic complexity, basic tools such as dynamic programming, sorting, searching, and selection; advanced data structures and their applications, graph algorithms and searching techniques such as minimum ...

Depth-first search (DFS) is an algorithm for traversing or searching tree or graph data structures. The algorithm starts at the root node (selecting some arbitrary node as the root node in the case of a graph) and explores as far as possible along each branch before backtracking.. A version of depth-first search was investigated in the 19th century by French mathematician Charles Pierre ...

Depth-first search - Wikipedia

In computational complexity theory, NP (nondeterministic polynomial time) is a complexity class used to classify decision problems.NP is the set of decision problems for which the problem instances, where the answer is "yes", have proofs verifiable in polynomial time.. An equivalent definition of NP is the set of decision problems solvable in polynomial time by a non-deterministic Turing machine.

NP (complexity) - Wikipedia

Syllabus CSE Department, IIT Kharagpur. Suggested assignments to be conducted on a 3-hour slot. It will be conducted in tandem with the theory course so the topics for problems given in the lab are already initiated in the theory class.

Syllabus - Indian Institute of Technology Kharagpur

The Midwest ML Symposium (MMLS) aims to convene regional machine learning researchers for stimulating discussions and debates, to foster cross-institutional collaboration, and to showcase the collective talent of machine learning researchers at all career stages.. Date: June 6-7, 2018. Location: Logan Center @ UChicago.

Another technique that has been used for some time is the application of generalized additive models (GAMs). By using single-feature models, GAMs limit interactions between features, thereby making each one more easily interpretable by users. 9 Employing these techniques, among others, to demystify AI decisions is expected to go a long way toward increasing the adoption of AI.

ICML 2019 Schedule

The fusion of law and equity in common law systems was a crucial moment in the development of the modern law. Common law and equity were historically the two principal sources of rules and remedies in the judge-made law of England, and this bifurcated system travelled to other countries whose legal systems were derived from the English legal system.
